

**Dr. Hyungwoo Lim**

Department of Forest Ecology and Management,  
Swedish University of Agricultural Sciences, Sweden

His main interest is to understand responses of forest ecosystem to changing climates and to human-induced disturbances. His work spans boreal forests to tropical plantations, and controlled greenhouse environments to plot-based field, and national scales. Rather easy-accessible and handy tools are preferred, e.g. inventory data, chain-saw, ruler, compass, etc.

He made Bsc and Msc in forest ecology in Chonnam National University, South Korea, and earned PhD in ecophysiology in Swedish University of Agricultural Sciences (SLU) in Sweden. He is currently working as Postdoc in Department of Forest Ecology and Management, SLU since 2018.
